CULTIVATION & SUPPLY

for perfumers

Grow *with us*

Formulance naturals does not only provide essential oils, vegetable oils and hydrolates: We now offer dedicated botanical cultivation. We grow the materials you need, to your brief, with full traceability to the field.

SECURED SOURCING

Your key ingredients are planted, grown and protected well in advance. A dedicated cultivation program shields your supply from market volatility and seasonal scarcity, so a signature material never puts a formula at risk.

FULL TRACEABILITY

Every batch can be traced back to the exact plot where it was grown. There are no blind spots and no anonymous intermediaries : the origin is documented all the way to your formula.

FAIR PARTNERSHIPS

Our cultivation projects are built on equitable, long-term relationships with growers and are eligible for Fair for Life certification. This gives your sourcing a verifiable ethical foundation your clients can trust.

CONVENTIONAL OR ORGANIC

Each program is set up to deliver precisely the standard you need. Whether your positioning calls for conventional or certified-organic material, the cultivation plan is designed accordingly from the start.

Dependable & *sustainable* supply you can build on *for years*

Cultivation programs run over multi-year horizons : 5, 7 or 10 years. This timeframe gives growers the stability and confidence to invest in your material, and the land the continuity to express its best.

How it works *step by step*

1

AUDIT

We define your brief: ingredient, olfactory profile, volumes, quality.

2

ROOT

We structure the right grower partnerships, matched to terroir and certifiable Fair for Life.

3

CULTIVATION

We structure the right grower partnerships, matched to terroir and certifiable Fair for Life.
